

LOADING THE DATASET

You must connect your data to IBM Cognos before you can create a view and perform any analysis. Cognos allows users to connect to a wide range of data that is kept in various locations.

Dataset:

The screenshot displays a WPS Office window with a spreadsheet titled 'LOADING THE DATASET.docx'. The spreadsheet contains a dataset for heart disease prediction. The columns are labeled: Age, Sex, Chest pain, BP, Cholestero, FBS over 12, EKG results, Max HR, Exercise an, ST depressi, Slope of ST, Number of, Thallium, and Heart Disease. The data is organized into rows, with the first row (row 1) containing the column headers and subsequent rows (rows 2-24) containing numerical and categorical data. The 'Heart Disease' column contains values '3 Presence' or '7 Absence'. The spreadsheet is displayed in a standard grid format with a ribbon at the top and a taskbar at the bottom.
